Reflections from Nanfa Phuengphet
(a primary school Maths teacher at Wat Chai Mong Kon School)

'Maths Through Stories' Workshop

Chulalongkorn University, Bangkok
Tuesday 19th May 2026

"Hello, my name is Nanfa Phuengphet. I am a primary school mathematics teacher from Wat Chai Mong Kon School under the Pathum Wan District Office, Bangkok Metropolitan Administration. I feel very grateful to Chulalongkorn University and the University of Reading for their kindness in organising such a wonderful workshop for us. I will definitely take the knowledge gained today to adapt and apply to my teaching. I feel that the 'Maths Through Stories' approach is a mathematics teaching strategy that gives children an opportunity to convey their learning outcomes while expressing their own identity through it. It is an excellent method that will build a highly positive attitude towards the subject for the children."
