Reflections from Dr. Phattharawadee Hadkaew
(Interim Director of the Primary Mathematics Department of the Institute for the Promotion of Teaching Science and Technology [IPST], Thailand Ministry of Education)

'Maths Through Stories' Workshop

Chulalongkorn University, Bangkok
Tuesday 19th May 2026

"Hello, I am Dr. Phatrawadee Phadkeaw, Interim Director of the Primary Mathematics Department at IPST – the Institute for the Promotion of Teaching Science and Technology. As for my thoughts on participating in today's training, I am absolutely delighted to have had the opportunity to attend. Truly, this workshop serves as a great source of inspiration for teachers to implement mathematical stories within their own classrooms. It is evident that the core concept of 'Maths Through Stories' helps children develop creativity and enables them to seamlessly connect mathematics with their real lives, allowing them to learn mathematics meaningfully. I would like to thank the speaker for coming to guide us and sharing such wonderful knowledge today. Thank you."
