

# Square Eyes

Illustrated by Gebiba  
Written by Gebiba

I would like to  
thank my family, Abi, Eleri and  
Dereje, and my wonderful  
Teacher Miss Bishop.

As Eleni woke up this morning,  
with bags in her eyes, in the  
distance she saw a grey pocket-sized  
box.

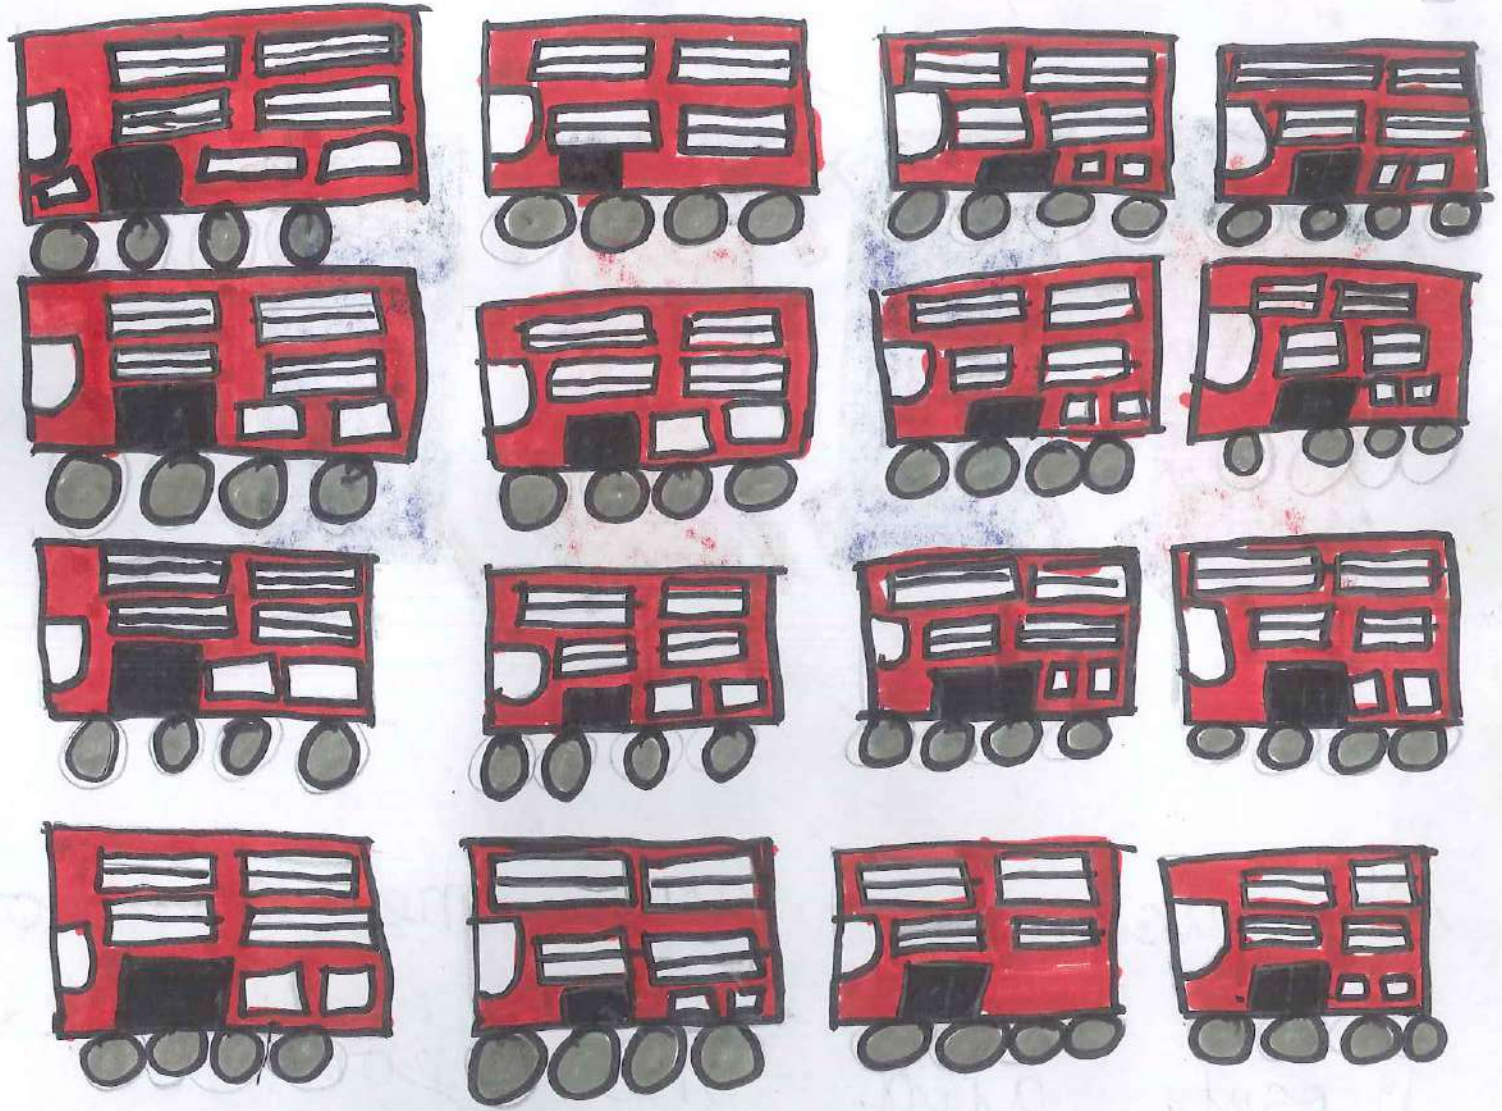

It was no ordinary box, it had to  
be unlocked with a code.

Confused, Eleri ran to the window and realized that everything was double itself

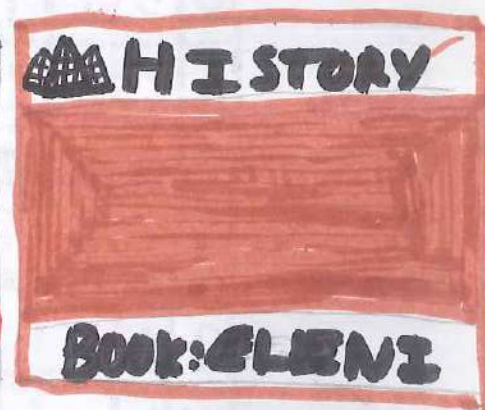

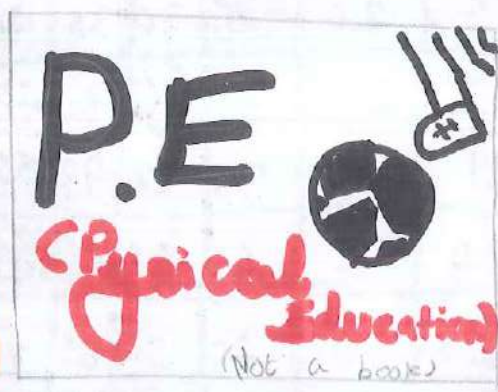

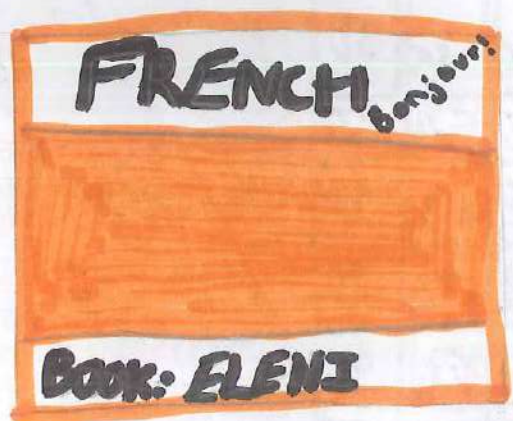

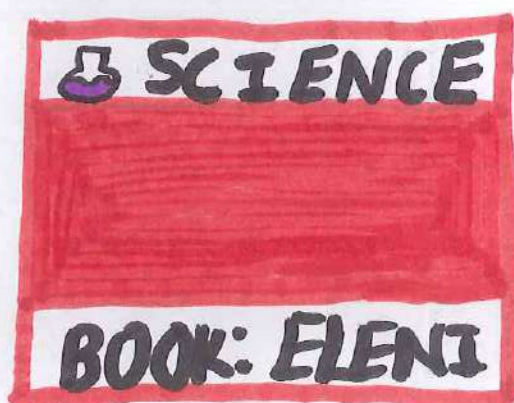

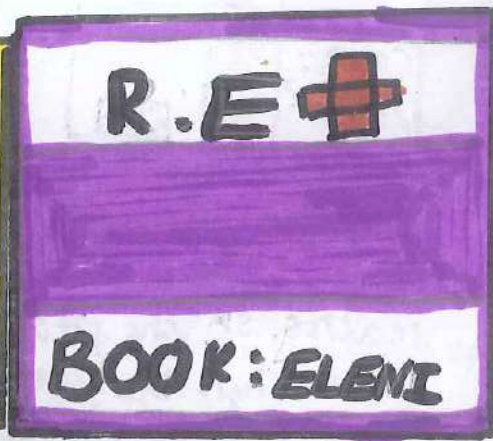

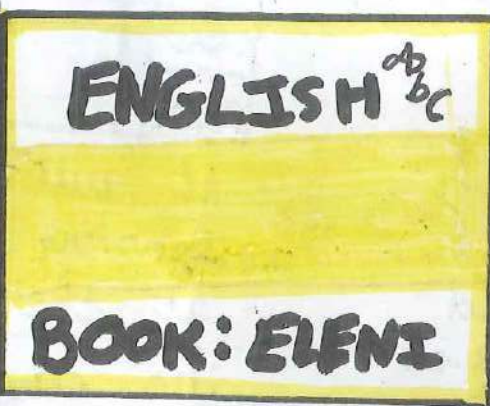

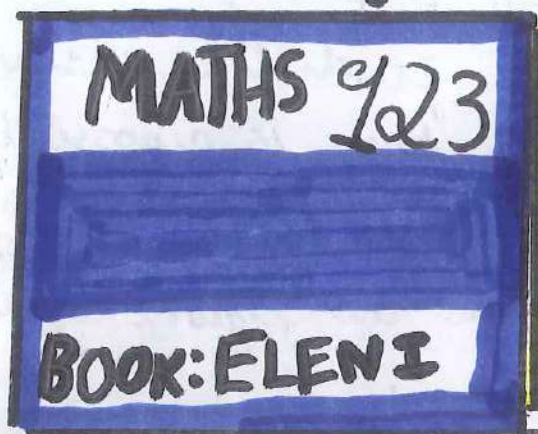

She usually has one bed for herself and one for her brother, Dereje. But somehow there was 4.

When she went outside there were  
16 busses when there was supposed to be  
4. But at least she got to school early.

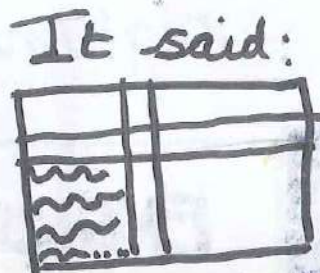

However, when she went to school she had nine lessons in one day! Eleni was living a nightmare.

6 She had to fix this!

Suddenly, she remembered about that peculiar box. It needed a code to open it. It said:

It said: "Even if you find the answer there is a possibility it will lead to certain doom!" Ignoring what it said, she looked at the clue and figured it out.

Unfortunately, she wasn't good at maths. So she pressed clue. Then by itself it turned around.

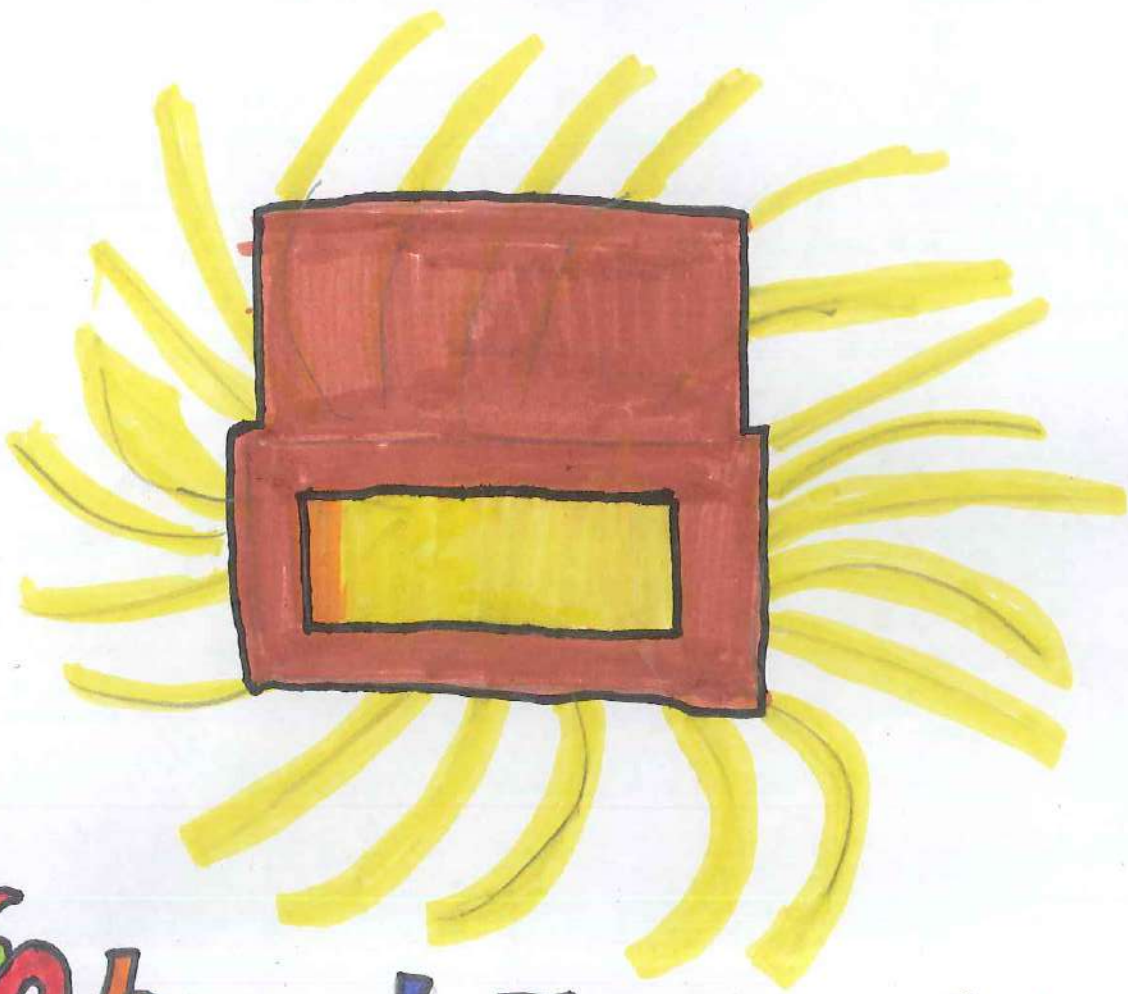

The clue was:

X	1	2	3	4	5	6	7	8	9	10
1	1	2	3	4	5	6	7	8	9	10
2	2	4	6	8	10	12	14	16	18	20
3	3	6	9	12	15	18	21	24	27	30
4	4	8	12	16	20	24	28	32	36	40
5	5	10	15	20	25	30	35	40	45	50
6	6	12	18	24	30	36	42	48	54	60
7	7	14	21	28	35	42	49	56	63	70
8	8	16	24	32	40	48	56	64	72	80
9	9	18	27	36	45	54	63	72	81	90
10	10	20	30	40	50	60	70	80	90	100

She realized all along that it was  
square numbers.

After that, she put the code in. Unexpectedly,  
a big light appeared.

“Oh no! Everything  
is cubed now!”

Eleni has to solve  
a clue to save the  
world. Do you think  
she can figure it  
out?
