Mr Long hand and Mrs short hand lived inside the clock with their 12 other friends. The friends names were: 1 hour, 2 hour and so on up until 12 hours.

1

The hour friends lived around the curves on the clock and went in order from smallest to largest. Between the houses were but 60 minutes (or 1 hour) for Mr. long to cross but 60 minutes (or 1 hour) for Mrs. short to cross.

2

Mr Long and Mrs Short hand's jobs were
to visit their friends in order all day long
Mr Long had long legs and could get to long
places quicker than Mrs Short.

3

One day Mr and Mrs hand got dizzy and stopped for a bit.

Don't stop Mr Long hand and Mrs short hand, we need to know when to go to school!

I'M SO DIZZY!

4

Mr and Mrs hand said:

The children checked their alarm clock
and found out that it was 7 o'clock.

5

Mrs hand moved to 7 hour and
Mr hand went to 12 hour because
O'clock means Mr long hand is at 12.

6

A few hours later the same thing happened again. The children came and told the hands that it was lunch time and that they should go to 12:15.
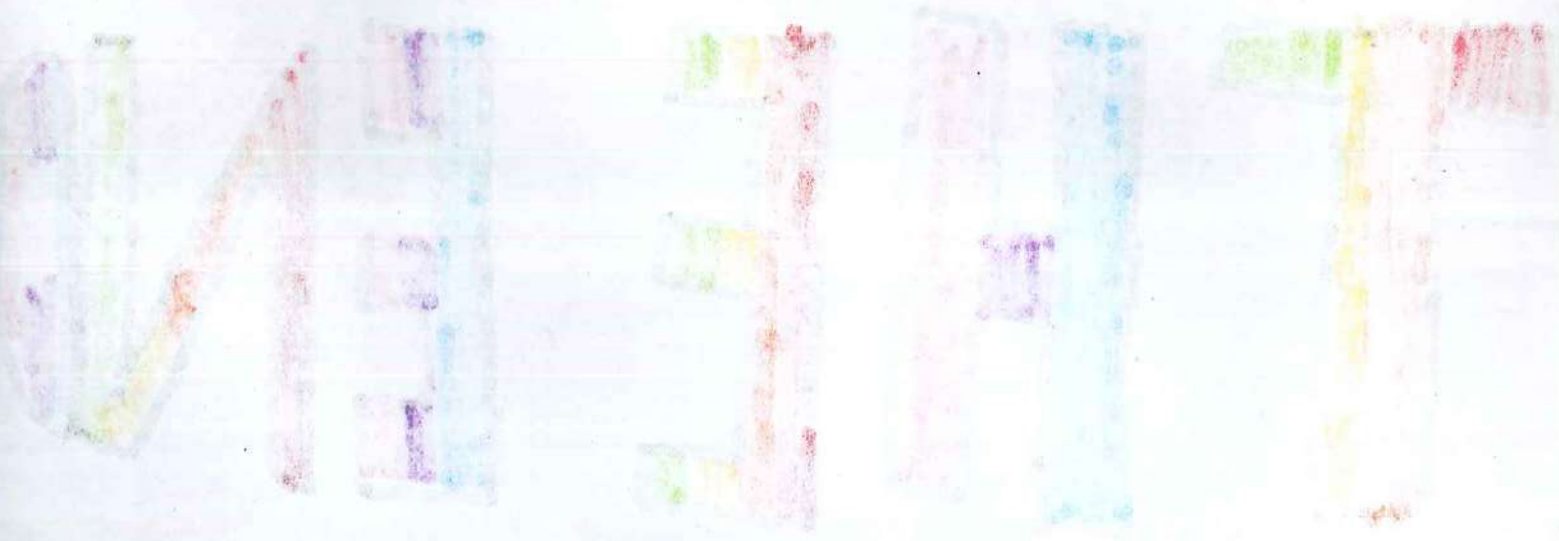

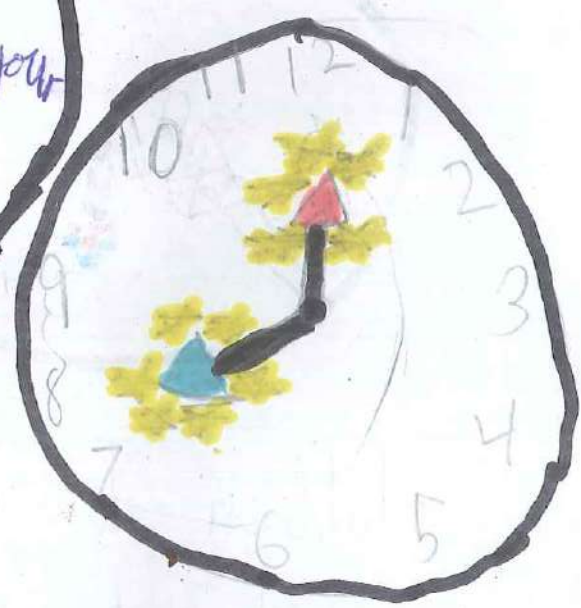

So Mrs Short hand moved to 12 but insted of 12 again, Mr long hand went to 3 because there are 15 minutes in 12:15 and each bridge takes 5 minutes to cross so 3 bridges of 5 minutes is 15 minutes.
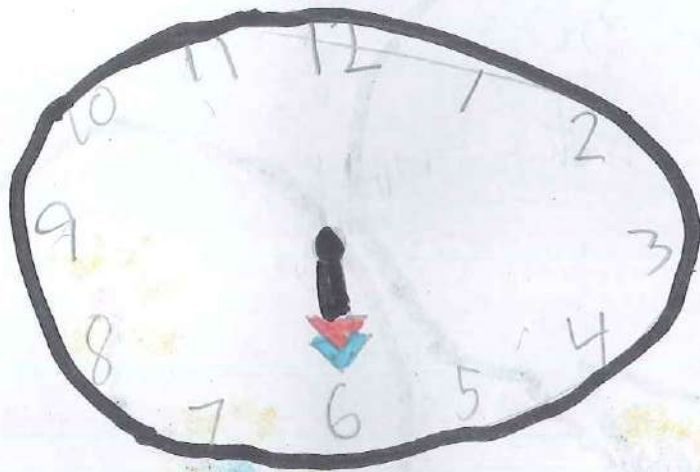

15minutes

8

At 6:30 in the night the hands
Stopped again." Quick move to your positions!!
the children said.

It's 6:30
Please go back to your
right places.

Mr long hand moved to 6 and Mrs short went to 6 because bridges of 5 minutes x 6 = 30 minutes and there are 30 minutes in 6:30.

The children looked at the clock and realised it was time for bed. "Goodnight!" exclaimed the children. "Goodnight!" Mr and Mrs hand shouted back.

THE END

10

AROUND The clock

Mr and Mrs hand live in the clock, but what happens when they get a bit dizzy and stop. Will they be able to make time right again?
