Illustrator : Abi

"Good morning," exclaimed Bing the Panda whilst stumbling down the crooked stairs.

"Morning Bing, I have a problem. Somehow we have been robbed! We have bamboo missing and portraits so can you go and try to get them back?" Mummy Panda cried.

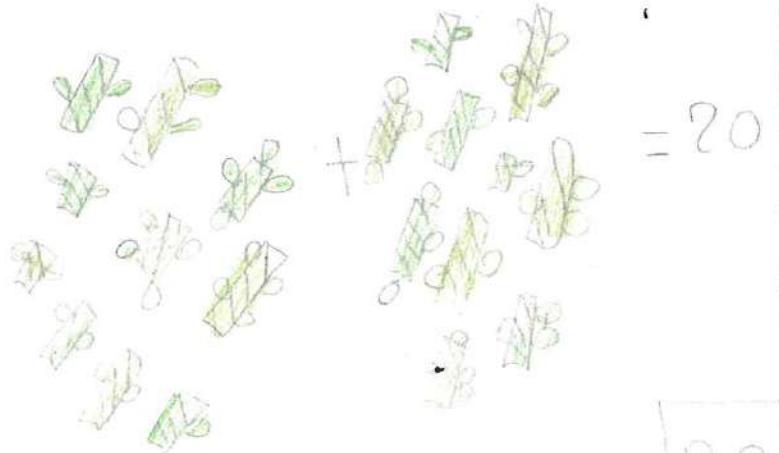

"Yes, I will try my best," Bing answered with a smile.

Bing ran out the door into the woods starting on his mission knowing it would a long journey. There she was, Abi the Penguin robber glaring into the distance. Abi took two boxes that held 10 bamboo sticks inside. Bing had to get the 20 bamboo sticks back.

$$10 + 10 = 20$$

ten plus ten equals twenty

coming to the large, green, silky field Bing found his friend there, it was Sparky the Tiger! Next to Sparky were three paths with penguin footprints on one, lions on the next and rhino on the giraffe path. Bing knew penguins could only walk 10 steps in an hour and on the first path were 3 lots of 10 which is 30. Abi must have been here for a long time.

$$10 + 10 + 10 = 30$$

ten plus ten plus ten equals thirty.

$$\begin{array}{ccc} \text{penguin icons} & + & \text{lion icons} \\ \text{rhino icons} & + & \text{giraffe icons} \\ \hline & & = 30 \end{array}$$

The penguin footprints led to a mountain range where they found the bamboo in a stream!

Abi was hiding behind a hut with the twelve portraits in his bag.

Bing managed to get to the portraits but could only get to 8 of them and left 4 with Abi.

$$12 - 8 = 4$$

twelve subtract eight equals four.

$$\begin{array}{r} \text{1} \square \\ \text{2} \square \\ \text{3} \square \\ \text{4} \square \\ \text{5} \square \\ \text{6} \square \\ \text{7} \square \\ \text{8} \square \\ \text{9} \square \\ \text{10} \square \\ \text{11} \square \\ \text{12} \square \end{array} - \begin{array}{r} \text{8} \square \\ \text{7} \square \\ \text{6} \square \\ \text{5} \square \\ \text{4} \square \\ \text{3} \square \\ \text{2} \square \\ \text{1} \square \end{array} = 4$$

There they found a river, near the mountains. Sitting down to have a snack, they watched the fish in the river and ate 5 of the fruits out of 10, they ate a pear an apple a banana an orange and a plum but left there other 5. Then they began their journey home giving up on their mission.

$$10 - 5 = 5$$

Ten subtract five equals five

$$\text{Fruit icons} - \text{Fruit icons} = 5$$

Tired, they scurried home over hills and valleys. After a while, they stopped to get a drink from a lake. Meanwhile, Bing spotted something floating, he dived in. SPLASH! It was the 4 other portraits from the 12 ones robbed by Abi.

$$8 + 4 = 12$$

eight add four equals twelve

$$\begin{array}{c} \text{---} \\ | \\ \text{---} \end{array} + \begin{array}{c} \text{---} \\ | \\ \text{---} \end{array} = 12$$

Home at last, Mummy Panda was proud of Bing and Sparky. Then, a minute later Sparky had to go home, unfortunately. Mummy Panda was so happy with Bing that she got him a present. It was Bob a pet fish!
