

80 APPLES

For 10 PIES

Writte and Illustrated

We have 4 apple trees in our

yard and it is time to pick

them. We are hoping to pick at

least 80 apples. So having 4 trees

We hope they each have 20 good apples. |

We grab our baskets and

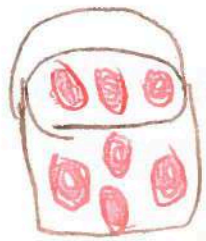

begin to pick. I fill my basket

with 10 apples. I put my

basket down to get water.

I come back my little brothe

is eating an apple.

Zahir you make me so angry  
when you touch my things! Mum  
and I are trying to collect 80  
apples to make pies.

Mom filled her 1st basket with 15 apples. Now I have 9. We need 61 more apples to reach our goal. So we

continue.

Our neighbor Fernando

and his daughter Sofia pass by.

Hola Dallas, what are you doing?

I answer, picking apples.

Can I

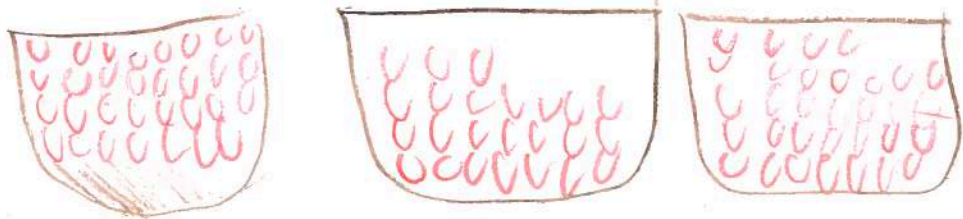

help she says? Of course, come on.

She grabs a basket, and begins to

help. Soon there were no more apples to

pick.

Mom counts hers, she has

31. I count mine and I have 24.

Sofia has 32.

Sissy walks

out back and says I have the  
crust ready for the pies!

We all

smile because we have more than

enough apples.
