

The Bow Store

Can I
buy 3 big
bows

Written and Illustrated by
Karley Chase

"Ellie come here, I am giving you \$10." Ellie's mom said. "Thanks mom. Can I go to the bow store?" Ellie said. Then her mom replied "Go ahead it is your money now."

"Hi" the cashier said. "Hi, my mom gave me some money so I am going to buy some bows." Ellie said. "I want 3 bows." Ellie said. "But you only have \$10." the cashier said.

"You can't get 3 bows because each bow cost \$5." said the cashier. "WHY?" said Ellie. Then the cashier said "Here let me show you!"

"You see if you divide 10 into three equal groups of 5. You won't be able to do that. What I am showing is a array. See now there is not enough." said the cashier.

Repeated Subtraction

$\begin{array}{r} 10 \\ - 5 \\ \hline 5 \\ \hline 0 \end{array}$ <p style="text-align: center;"><u>1 set</u></p>	$\begin{array}{r} 10 \\ - 5 \\ \hline 5 \\ - 5 \\ \hline 0 \end{array}$ <p style="text-align: center;"><u>2 sets</u></p>	$\begin{array}{r} 0 \\ - 5 \\ \hline \end{array} \times$ <p style="text-align: center;">you can't subtract 5 from 0</p>

In the Cashier's mind

"Ohhh, I see I think I know another way called repeated subtraction." Ellie had said.

"You see just subtract 5 from 10 until you get to 0." said the cashier.

"Ok, so I have to buy 2 bows." Ellie replied with confidence. "Correct." the cashier said with happiness. "Yup, because I have \$10." Ellie said.

"Well here is your money." said Ellie. "Have a great day." the cashier said. "Oh, and thanks for helping me with division." Ellie said. "Your welcome." the cashier replied.

Mom can
I have more
money!!!

This book is about a little girl name Ellie. She is confused with division. She has ten dollars but wants 3 bows. Each bow costs \$5. Then the cashier explains to her how to perform division.

ABOUT THE AUTHOR

Hi, I am Fourth grader Karley Chase. I go to Lake Arbor Elementry School. I love to go to stores. I live in the United States. I am 10 years old. I wrote this because I was confused with division. I love bows. And last but not least I love matho
